Hey Darcy:

Sorry, I wasn't able to return your call, I've been booked....

Here is my recommendation for Monday:

We can do intros etc., and I will lead off with the following 6 questions:

1. What is the justification needed to demonstrate there is a need for a variance?
2. How do we identify HAC?
3. How will we define the length of the variance?
4. How will we provide a justification for the timeframe to meet HHC?
5. How shall we include a re-evaluation component?
6. What does the process moving forward look like?

Then our staff will dive into these questions individually.

I really hope you are here in person.

Have a great weekend, George
